- Bootstrap
- WordPress

EDUCATION

Collin College
Plano, TX

Associate of Applied Science
Graphic Design Technology

EXPERIENCE

9/13 - Present   **Web Developer, Graphic Designer (Freelance)**   **Dallas/Ft Worth, TX**

I build and manage websites for individuals and small businesses using a full stack build process and in occasional WordPress environments. Areas of work include logos, online ads, and graphic design. Frequently I pursue entrepreneurial opportunities to create work for sale and self-promotion.

5/18 - 8/19   **Email Developer**   **TGI Fridays, Dallas, TX**

I created visually appealing and usable email designs promoting various specials and promotions. Using Salesforce Marketing Cloud, I built the HTML framework of emails to be universally compliant and device compatible. I used proprietary scripting to connect notification emails with the online ordering system. I also created many static and motion graphic pieces used on social media and on mobile and desktop websites.

1/17 - 3/18   **Web Developer, Graphic Designer**   **AlphaGraphics of Carrollton, TX**

I managed hundreds of online customer ordering portals to produce on-demand printable products. In a large capacity, I maintained a customer facing front-end interface using HTML/CSS, JavaScript, Bootstrap, and AngularJS in a .NET environment. In addition, I built frequent marketing promotional sites and email campaigns reaching thousands of current and potential customers. When necessary, I created traditional pieces, including business cards and brochures.

5/15 - 9/15   **Web Developer**   **Digital Sushi Studios, Ft Worth, TX**

As a contractor, I was tasked with the responsibility of building web sites for various clients in many different industries. On a part-time basis I would design and develop a web application for the client's specific needs in custom and WordPress environments. I was able to introduce a method of production, completing projects in a timely fashion.

9/13 - 10/14   **Web Designer**   **GameStop, Inc., Grapevine, TX**

As a senior level designer, my duties involved producing core components of GameStop.com and creating high-level concepts. As part of an over-arching design team, I touched on various UI/UX web development projects as well as highly involved marketing promotions. I acted as mentor for lower-level designers and web production artists in my group.

3/13 - 9/13   **UI/UX Designer**   **AutoStar Solutions, Ft Worth, TX**

Maintaining two roles simultaneously to provide support to Software Development and Marketing, I split my time designing the user interface for the company's flagship software. Additonal time was spent managing the corporate website and auxiliary services.
